

**Installation Instructions
Powersports Division**

For aries AE1 P/N:

81-10027

81-10056

87-10027

87-10056

Parts list

**aries AE1 air filter
foam gasket**

Step 1

Remove the air box cover. Remove the filter from the air box. Remove the foam filter from the stock plastic filter cage. Do not discard the filter cage, it will be used.

Step 2

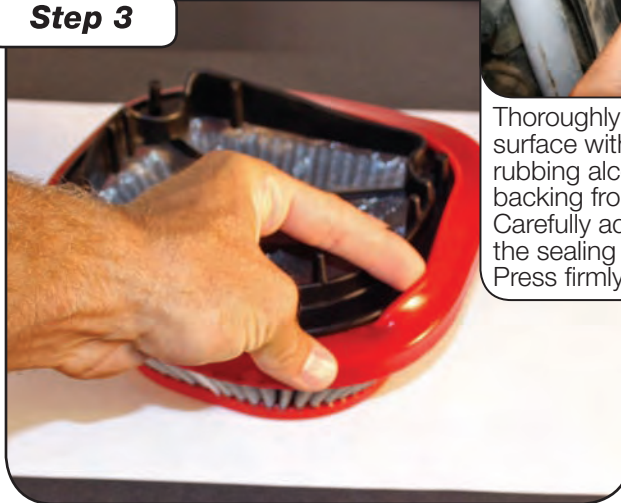

Place the stock plastic filter cage inside the aries AE1 filter. Line-up the hole of the filter and the stem of the filter cage. Gently push the filter over the cage stem.

Step 4

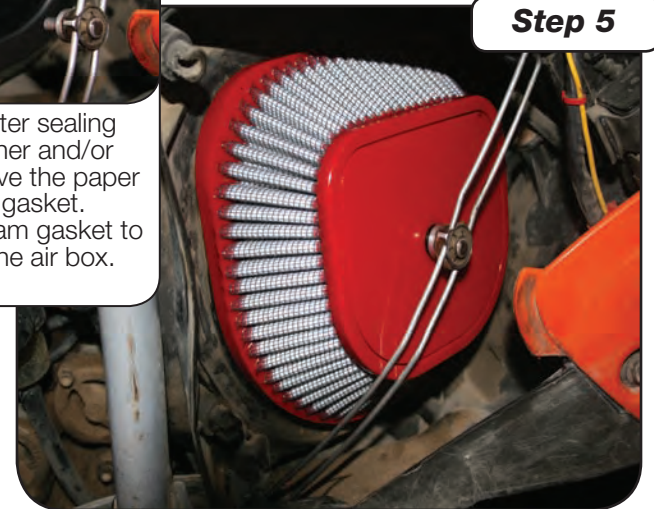

Thoroughly clean the filter sealing surface with parts cleaner and/or rubbing alcohol. Remove the paper backing from the foam gasket. Carefully adhere the foam gasket to the sealing surface of the air box. Press firmly into place.

Step 3

Using your finger, gently pull the seal of the filter over the lip of the filter cage.

Step 5

Install the aries AE1 in the air box using the stock mounting bracket. The installation of your aries AE1 filter is now complete. Replace the air box cover and go ride! We recommend you clean your aries AE1 filter every 2 to 4 rides.
