FEATURES & BENEFITS

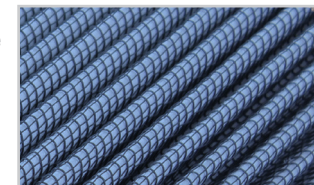

Full Urethane Framed Construction

aFe Power performance air filters are constructed using full 360 degree urethane frames. This construction is very rigid and allows for a proper fitment with excellent filter strength.

Rounded Pleats

aFe performance air filters use a rounded pleat design, which produces more useable filter surface area for increased flow and greater dust holding capacity.

Molded-In Inserts

Used with provided screws to secure filters in place for true OE fitment.

P/N	Jobber/Map	Feature
10-10131	\$189.95	
11-10131	\$189.95	

Price level "a"

Consists of two filters.
