

TOYOTA TACOMA

2005-2008 V6-4.0L (1GR-FE)

P/N
49-46001
49-46002

PERFORMANCE EXHAUST

Features:

- High performance
- 3" mandrel-bent
- 100% 409 SS
- Factory style band clamps and hangers

Benefits:

- + 150% flow increase
- + 30 lbs x ft torque
- + 26 H.P.

Tech Sheet

Exhaust Systems

aFe exhaust systems are manufactured in-house to the highest engineering standards for performance and quality. All tubing is 100% mandrel-bent to provide the highest flow possible. Each system is extensively dyno and flow bench tested to provide maximum gains for your truck.

Material	3" 409 stainless tube
Muffler	5"x11" 409 stainless steel
Clamps	band clamp(409 SS)
Tail-Pipe	1-piece
Tip	Yes (304 SS)
Install Time	1 hour

Application

Make Toyota

Model Tacoma

Year 2005-2008

Engine V6-4.0L (1GR-FE)

Chassis ACSB, DCSB, DCLB

Features & Benefits

Bayonet hangers

Swaged bayonet ends lock your exhaust component into place for the most secure installation possible. Other manufacturers use less expensive bent hangers that allow tubes and parts to slide from side to side, causing premature wear and damage.

Welded-on hangers

Every hanger is welded on each side to ensure a stronger connection, compared to other manufacturers who use only inferior floating hangers.

Band style clamps

Premium-quality band clamps are used on critical joints to provide the tightest, leak-free seal possible. Other systems use common, less expensive U-bolt clamps.

Mandrel bent

All aFe tubing is 100% mandrel-bent. Mandrel bending ensures the tubing maintains its shape and size, providing smooth, unrestricted airflow. Standard tubing can lose as much as 20% of its diameter in sharp bends.
