Features

Specifications

Performance Air Suspension Front Kit P/N 75521

- Sleeve air spring with 30-level damping adjustable, monotube, threaded body shock with independent ride height adjustment.
- Red anodized upper mount with high quality spherical bearing.
- Black chromed steel shock bodies and black anodized lower mounts.
- Bright red anodized aluminum end caps and locking rings.

- Monotube shocks and progressive rate air springs provide fantastic ride quality.
- Handling on par with premium coil-over kits and tested on the racetrack.
- With huge range of available damping adjustment, driver can alter settings to maximize handling or create preferred ride feel.
- Adjustable lower perches allow ride height to be changed independently of pressure so user can dial-in preferred pressure/ride height combination.

Air Spring Type: Sleeve
Vehicle Drop: 93mm/3.57"
Suspension Travel: 163mm/6.4"
Damping: 30 level adjustable
Pressure (Ride Height): 100 PSI
Vehicle Modifications: None
Rig Testing: Tested to more than one million cycles to ensure long life and performance.
Warranty: Limited One Year
Installation Manual: MN-900

Performance Air Suspension Rear Kit P/N 75621

- Compact double bellows airspring with bright red anodized spacer and black roll plates in factory coil location.
- 30-level adjustable, monotube, threaded body shock with independent height adjustment.
- Red anodized upper shock mount with rubber isolated mount.
- Black chromed steel shock bodies and black anodized lower mounts.

- Monotube shocks and progressive rate air springs provide fantastic ride quality.
- Handling on par with premium coil-over kits and tested on the racetrack.
- With huge range of available damping adjustment, driver can alter settings to maximize handling or create preferred ride feel.
- Includes remote damping adjusters to facilitate shock tuning.
- Air springs are lighter than steel coil springs, reducing unsprung mass for better ride and handling.

Air Spring Type: Bellow
Vehicle Drop: 123mm/4.8"
Suspension Travel: 140mm/5.5"
Damping: 30 level adjustable
Pressure (Ride Height): 68 PSI
Vehicle Modifications: None
Rig Testing: Tested to more than one million cycles to ensure long life and performance.
Warranty: Limited One Year
Installation Manual: MN-905

4-way Paddle Control Air Management System P/N 27666

- Economical and simple 4 corner control system.
- 2" OD gauges fit in many gauge and pillar pods.
- Stainless steel switch plate with durable paddle switches
- Complete system includes everything needed to install.

- Features a VIAIR® 100% duty cycle 16380 compressor.
- 1/4" air line for accurate and smooth adjustment.
- Attractive stainless steel switch plate.
- Features 2 dual needle analog gauges.

Compressor: VIAIR® 16380
Maximum Pressure: 175 PSI
Air Lines: 1/4" diameter
Duty Cycle: 100%
Tank Size: 5 Gallon
Warranty: Limited One Year
Installation Manual: MN-726
