## Performance Air Suspension Digital Combo Kit #95721

for the Nissan Z34 370z & Infiniti G37

### Contents

### Descriptions

### Features

### Specifications

#### Performance Air Suspension Front Kit P/N 75521

- Sleeve air spring with 30-level damping adjustable, monotube, threaded body shock with independent ride height adjustment.
- Red anodized upper mount with high quality spherical bearing.
- Black chromed steel shock bodies and black anodized lower mounts.
- Bright red anodized aluminum end caps and locking rings.

- Monotube shocks and progressive rate air springs provide fantastic ride quality.
- Handling on par with premium coil-over kits and tested on the racetrack.
- With huge range of available damping adjustment, driver can alter settings to maximize handling or create preferred ride feel.
- Adjustable lower perches allow ride height to be changed independently of pressure so user can dial-in preferred pressure/ride height combination.

**Air Spring Type:** Sleeve  
**Vehicle Drop:** 93mm/3.57"  
**Suspension Travel:** 163mm/6.4"  
**Damping:** 30 level adjustable  
**Pressure (Ride Height):** 100 PSI  
**Vehicle Modifications:** None  
**Rig Testing:** Tested to more than one million cycles to ensure long life and performance.  
**Warranty:** Limited One Year  
**Installation Manual:** MN-900

#### Performance Air Suspension Rear Kit P/N 75621

- Compact double bellows airspring with bright red anodized spacer and black roll plates in factory coil location.
- 30-level adjustable, monotube, threaded body shock with independent height adjustment.
- Red anodized upper shock mount with rubber isolated mount.
- Black chromed steel shock bodies and black anodized lower mounts.

- Monotube shocks and progressive rate air springs provide fantastic ride quality.
- Handling on par with premium coil-over kits and tested on the racetrack.
- With huge range of available damping adjustment, driver can alter settings to maximize handling or create preferred ride feel.
- Includes remote damping adjusters to facilitate shock tuning.
- Air springs are lighter than steel coil springs, reducing unsprung mass for better ride and handling.

**Air Spring Type:** Bellow  
**Vehicle Drop:** 123mm/4.8"  
**Suspension Travel:** 140mm/5.5"  
**Damping:** 30 level adjustable  
**Pressure (Ride Height):** 68 PSI  
**Vehicle Modifications:** None  
**Rig Testing:** Tested to more than one million cycles to ensure long life and performance.  
**Warranty:** Limited One Year  
**Installation Manual:** MN-905

#### AutoPilot V2 Digital Air Management System P/N 27671

- Pressure based, digital control system with easy to install, super compact ECU/manifold assembly.
- 256 color LCD display with 1-wire hook-up.
- OEM quality wiring harness with only 3 wires to connect to your vehicle.
- A complete kit ready to install!

- 8 presets for your favorite ride heights.
- User selectable pressure accuracy: up to +/-1 PSI.
- Rise on start Feature - no driver input required.
- Manual mode-independent 4 corner adjustment.
- AutoTune learns and adapts to your vehicle.

**Compressor:** VIAIR® 16380  
**PSI Rating:** 175 PSI Maximum  
**Air Lines** 1/4" diameter  
**Duty Cycle:** 100%  
**Tank Size:** 5 Gallon  
**Warranty:** Limited One Year  
**Installation Manual:** MN-784
