Airaid Premium Filter

#### **Tools Required For Installation:**

Bracket

3/16" Plastic Plug

Small Rubber Washer

5/16",10mm, 12mm,and 13mm Sockets
Ratchet & Extension
7/16" Wrench
5/32" Allen Wrench
Phillips Head Screw Driver

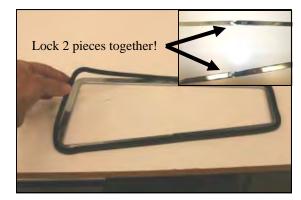

**3.** Remove the complete intake tube from the vehicle.

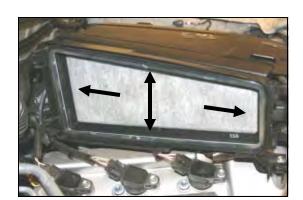

**4.** Unlatch the two clips that hold the cover on the factory airbox and remove the cover and the factory air cleaner.

**5.** Remove the rubber gasket from around the factory air cleaner.

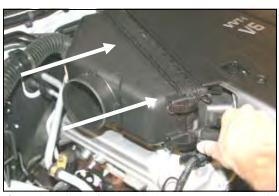

**6.** Lay the left and right gasket support frames (#5) & (#6) on a workbench (see inset) and reinstall the factory rubber gasket around the outside as shown.

**7.** Re-install the gasket assembly back into the factory airbox as shown. Do not tamper with the factory hydrocarbon filter, as this will void the vehicle manufacturer's warranty, and street legal status in the state of California.

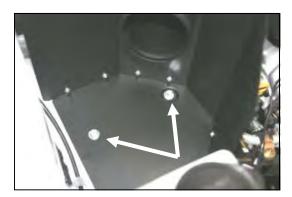

**8.** Install the two rubber washers (#19) onto the two plastic plugs (#18) that are provided in the hardware kit, and insert them into the two weep holes in the factory air cleaner cover removed in step #4, as shown

**9.** Re-install the factory airbox cover, and re-latch both clips.

**10.** Assemble the Cool Air Dam panels (#2), and (#3) using the six supplied screws (#9), washers (#10), and nuts (#11), as shown.

13. Install the **CAD** into the vehicle by aligning the hump hose with the tube on the factory airbox, and then aligning the two holes in the bottom of the **CAD**, and the bracket, with the three mounting holes on the inner fender. Install the three supplied 8mm bolts (#12) and washers (#15).

#### 16. Double check your work!

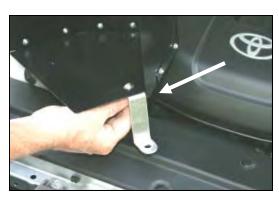

Make sure there is no foreign material in the intake path. Make sure all clamps, hoses, bolts, and screws are tight. Periodically check the tightness of all hose clamps. Double check the hood clearance.

**11.** Install the urethane hump hose (#4), and two #72 hose clamps (#8) on the tube of the **CAD** as close to the panel as possible. Leave the hose clamps loose for now.

**14.** Center the hump hose between the tube on the factory airbox, and the tube on the **CAD**, adjust for fit, and tighten the hose clamps. Now tighten the button head bolt that holds the bracket to the **CAD**.

**12.** Install the bracket (#17) on the front of the **CAD** using the 1/4-20 button head bolt (#13), 1/4" flat washer (#14), and 1/4" serrated nut (#15), as shown. Just snug the bolt for now, there will be some adjustment needed once the **CAD** has been installed.

**15.** Install the Airaid Premium Filter (#1) on the **CAD** tube and tighten the clamp. Next install the weather strip (#7) on top of the **CAD** as shown. For an easier install, start at the fender side of the **CAD** and work your way towards the radiator.

# 17. Reconnect the negative battery cable!

Included with your Airaid Intake System is a sticker with a California Air Resources Board (C.A.R.B.) Executive Order (EO) number. This sticker must be placed in plain view inside of the engine compartment. Failure to do so may prevent you from passing a smog inspection.

# Before!

# After!

Thank you for purchasing the Airaid Intake System. Contact Airaid @ (800) 498-6951 8:00 AM - 5:00 PM MST weekdays for questions regarding fit or instructions that are not clear to you. Your Airaid Intake System was carefully inspected and packaged. Check that no parts are missing, or were damaged during shipping. If any parts are missing, contact Airaid. The air filter element is protected from direct exposure to water and debris, care should be taken not to drive through deep water. WATER INGESTION IS THE DRIVERS RESPONSIBILTY! The air filter is reusable and should be cleaned using the Airaid Filter Tune-Up Kit periodically.

Synthamax Air Filters <u>do not</u> require <u>oil</u>. Service air filter as needed by cleaning with common non-petroleum all-purpose household cleaner and water. Simple Green®, Formula 409® or equivalent works great. Apply cleanerif necessary. Do not apply high pressure water or air to clean filter. Allow filter to air dry and reinstall. to outside of air filter and allow to soak. Then flush filter clean from the inside out with a garden hose and repeat steps
