

EGR COMPLIMENT KIT P/N# 1030030

1996-98 6BTA DODGE RAM CUMMINS

Dodge Ram diesels manufactured for California in 1996 came equipped with an Exhaust Gas Recirculating (EGR) valve. This valve needs to be controlled to prevent it from opening when an exhaust brake is engaged.

The installation of the BD EGR Compliment kit is required on all 1996-98 Dodge Ram diesels equipped with an EGR system.

****NOTE**:** Ensure that the copper tubing is properly secured to prevent breakage.
