INSTALL NOTES:

- DRILLING REQUIRED
- CLEAR SPARE TIRE WELL
- SILICONE SEAL HARDWARE

INSTALLATION STEPS

1. This hitch mounts to the vehicle's spare tire well and to the aluminum bumper beam found inside the rear plastic bumper fascia. A hole saw is recommended for two clearance holes in fascia under the bumper beam.
2. Remove spare tire and other contents from spare tire well.
3. Hold the hitch centered on the vehicle with the curved hitch bracket against the vertical wall of the spare tire well. Mark and drill the bumper fascia for two clearance holes for the hitch spacer tubes using 1" diameter or larger hole saw.
Note: The curved bracket may be close or in contact with the vehicle's fuel tank strap.
4. Raise the hitch into position and carefully mark the bumper beam and tire well for mounting holes. Center punch and drill the bumper beam two places for 3/8" fasteners.
5. Mount the hitch using fasteners as shown.
6. Torque all 3/8" fasteners to 45 lb-ft.
7. Use silicone sealant to seal hardware installed through spare tire well.
8. Reinstall spare tire and other contents removed in Step 2.

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.
