TRIM

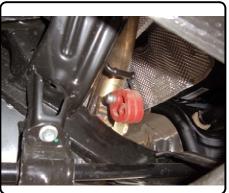

INSTALLATION WALKTHROUGH:

For more information log onto www.curtmfg.com, & for helpful towing tips log onto www.hitchinfo.com

 Lower exhaust by removing isolator bracket bolts with a 13 mm socket on each side of vehicle.
Exhaust hanger on forward driver side of vehicle will also need to be disconnected for ease of installation.

2. The exhaust heat shield will need to be removed to mount the hitch side brackets. Remove the bolt from the driver side with a 10 mm socket and either bend the heat shield away, or trim as shown and reattach to the existing mounting point.

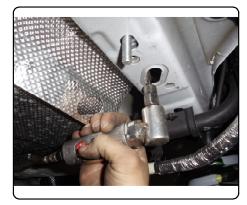

INSTALLATION WALKTHROUGH:

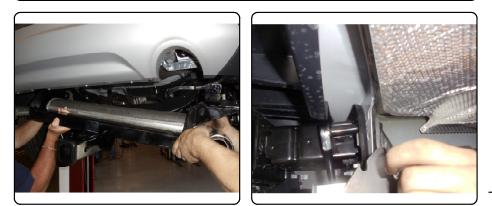

3. Enlarge access holes for square hole spacers with a die grinder.

Fishwire 7/16" bolts and spacers into vehicle frame for the (3) side bracket mounting points on each side of the vehicle.

4. Slide hitch in from rear passenger side of vehicle for ease of installation and mount up to frame and secure to fishwired hardware. Secure rear mounting hardware to rear mounting surface once hitch is in place.

For more information log onto www.curtmfg.com, & for helpful towing tips log onto www.hitchinfo.com

 Reattach muffler isolator brackets to original mounting locations, at bottom surface of hitch side brackets. Torque all 7/16" fasteners to 70 ft-lbs. Torque all M8 fasteners to 23 ft-lbs.

6. Installation is complete.
