# Mud Flap Installation Instructions DZ 2805

# (1999 - Current) Ford Superduty Dually Mud Flap F150 / F250 / F350

Congratulations on your purchase of a quality Dee Zee product. Dee Zee is recognized as having the highest quality running boards and accessories on the market today. We have earned this reputation by offering our customers a product they can be proud to place on their vehicles. Dee Zee meets all the criteria of manufacturing a custom-fit product which guarantees it to be the easiest product to install.

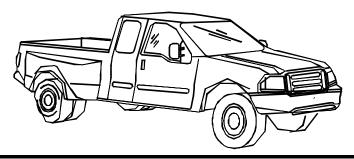

#### **TOOLS REQUIRED:**

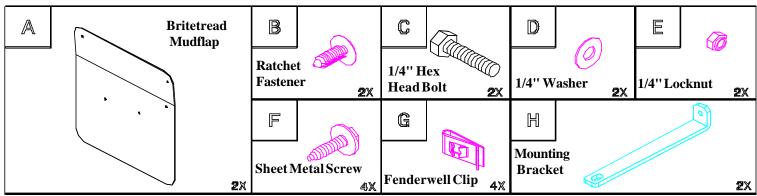

10mm Wrench
13mm Wrench
Phillips Screwdriver
Regular Screwdriver
Locking Pliers
Drill with a set of bits

PARTS LIST:	QTY
Britetread Mud Flaps (A)	2
Mounting Brackets (H)	2
Hardware Bag	1

**INSTRUCTIONS:** Please take time to read all instructions <u>carefully</u> before beginning installation.

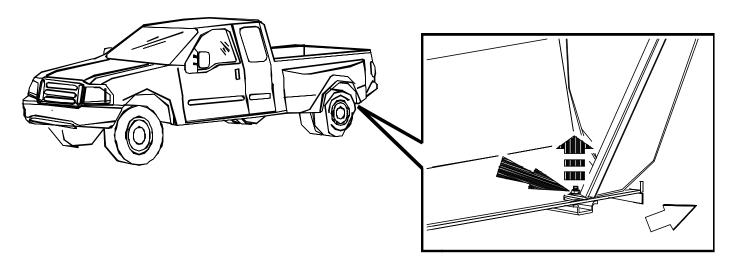

NOTE: Not responsible for damages to the body of the vehicle if the product is improperly installed.

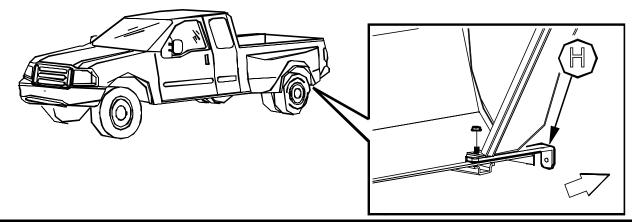

#### Step 1

Using the drawing below as a guide, locate the existing bolt on the rear inner fender well and remove this bolt and nut using a 10mm and 13mm wrench.

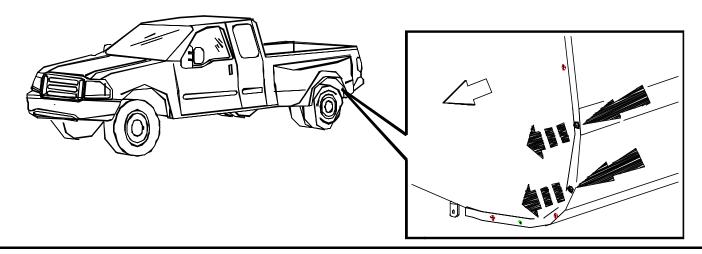

## Step 2

Using the drawing below as a guide, place the mounting bracket (H) into place as shown and then replace the existing nut and bolt.

Step 3

Using the drawing below as a guide, locate and remove the ratchet fasteners in the fender well using a regular screwdriver and locking pliers. Once these have been removed, discard them.

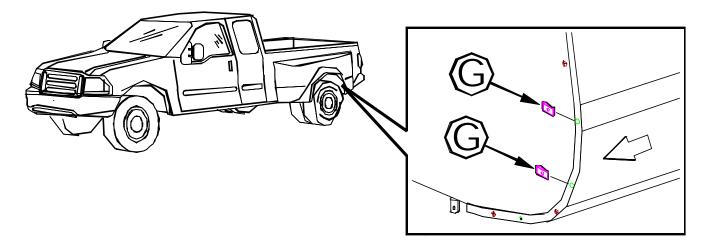

Step 4

Using the drawing below as a guide, place a fenderwell clip (G) onto the fenderwell lip as shown at each of the locations.

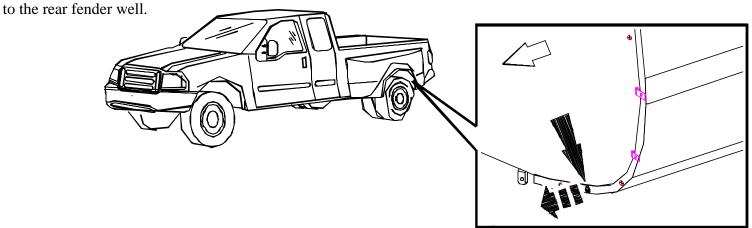

Fender Well Clip (G)

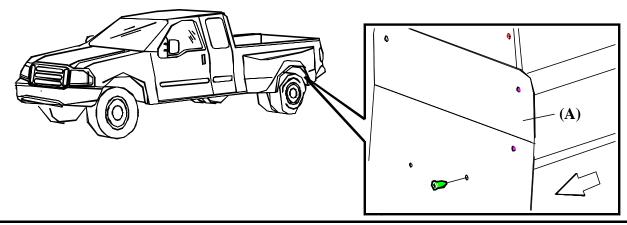

#### Step 5

Using the drawing below as a guide, locate the phillips head screw at the bottom of the inside rear fender well and remove it using a phillips head screwdriver. Do not discard it, since it will be used in Step 6 to locate and attach the britetread mudflap

#### Step 6

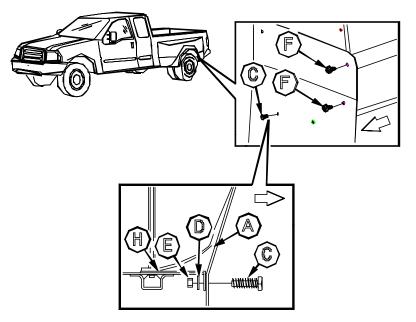

Using the drawing below as a guide, place the phillips head screw through the pre-punched hole in the britetread mudflap and into the existing threaded hole in the rear fender well.

### Step 7

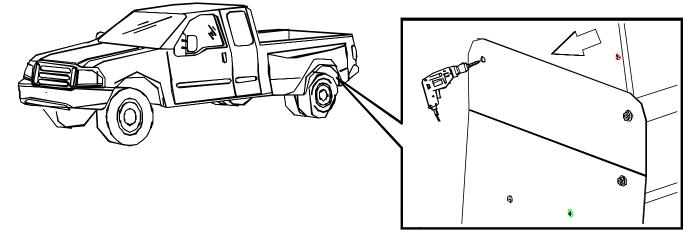

Using the drawing to the right as a guide, place sheet metal screw (F) through the britetread mudflap (A) and into the fenderwell clips (G) which were installed in Step 4. Secure into place using a phillips head screwdriver.

Now place a 1/4" hex head bolt (C) through the existing hole as shown in the drawing to the right. The 1/4" hex head bolt (C) will go completely through the britetread mudflap (A) and the mounting bracket (H) installed in Step 2. Secure into place using a 1/4" flat washer (D) and 1/4" locknut (E). Tighten until snug using a 13mm wrench.

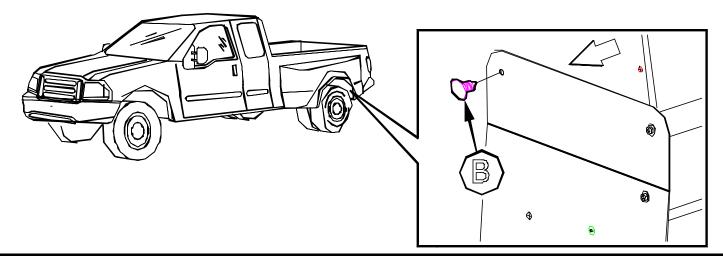

#### Step 7

Using the drawing below as a guide, drill a 1/4" hole through the britetread mudflap (A) and the plastic of the inner fender well.

#### Step 8

Using the drawing below as a guide, place a ratchet fastener (B) through the drilled hole in the britetread mudflap (A) and the plastic of the inner rear fenderwell. Press the ratchet fastener (B) firmly into place.

Repeat Steps 1 through 8 for the passenger side of the vehicle.
