

X **TERMINATOR®**
Off-Road X-Pipes
by **FLOWTECH**
53626 FORD MUSTANG 5.0L 1994-95

NOTE: IT IS THE INTENT AND DESIRE OF THE MANUFACTURER THAT THIS PRODUCT BE USED IN COMPLIANCE OF ALL LOCAL, STATE, AND FEDERAL EMISSIONS LAWS AND REQUIREMENTS. THEREFORE:

This device is not legal for use on pollution-controlled vehicles. It is intended for use on racing only vehicles that will never be driven upon a highway. If you have any questions concerning how this affects you and your vehicle, contact the dealer from whom you purchased this device or contact the factory direct.

We realize that you had many choices when you made your purchase, and we thank you for choosing **FLOWTECH®**. At **FLOWTECH**, we've put our many years of performance exhaust experience into every product we build. We feel and know you will agree that **FLOWTECH** Products are the best you can buy at any price.

As a result of the restricted room available on some applications, you may experience a close fit to some body and chassis components. This is a normal condition. If this is your first time installing an exhaust product, it may be time consuming. While not complex, stick with it. As soon as you start your engine, the reward of additional horsepower and performance will be well worth your efforts.

Read these instructions carefully before starting:

For the ease of installation, your vehicle must be raised a minimum of 24".

Warning: Should you decide to install any exhaust products yourself, be warned that the original equipment jack that came with the vehicle is intended for emergency use only. The use of a frame jack, in conjunction with a floor jack as the main support, is highly recommended to minimize the accidental dropping of a vehicle while the installation proceeds. Never go under any vehicle that is supported by a bumper jack!

Tools required: 3/8" drive ratchet, 5/8" and 11/16" sockets, 5/8", assorted socket extensions, 10mm, 11/16", and 7/8" wrenches, lubricant (WD-40 or equivalent), and the proper lifting devices mentioned in the above paragraph.

1. Removing the factory H-pipe:

- A. Disconnect the battery to prevent accidental damage to electrical system.
- B. Remove the sensor units using the 7/8" wrench.
- C. Disconnect the stock H-pipe from the exhaust manifolds or headers using, the 5/8" socket with the long extension to remove the four nuts.
- D. Remove the four nuts connecting the back of the H-Pipe to the tailpipe system, using the 5/8" socket.
- E. Loosen the clamps that hold the air tube to H-Pipe using a 10mm wrench.
- F. Push the tailpipe assemblies back towards the rear of car, and let the tailpipes swing down to allow clearance to slide the H-Pipe back and remove it from vehicle.

2. Installing your FLOWTECH Off-Road "Racing Only" X-Pipe.

- A. Place the forward left & right manifold extension tubes into the X-Pipe assembly. Do not tighten at this time.
- B. Place **FLOWTECH Off-Road "Racing Only" X-Pipe** into position, your **FLOWTECH** X-pipe does not use the factory rubber mounts

- C. Attach the **FLOWTECH Off-Road "Racing Only" X-Pipe** to the exhaust manifolds or headers using the original mounting hardware, and tighten evenly.
- D. Connect the oxygen sensors and air tube (using the original clamp) to the X-Pipe. The **FLOWTECH** X-pipe comes with the end of the air tube crimped. Cut approx. 1½" off the end of the tube, if car is equipped with a factory air pump.
- E. Install the back of the X-Pipe to the exhaust system using the four 7/16" nuts, bolts, and washers supplied with kit. Tighten evenly, making sure the tailpipes align and have ample clearance (including the rear valance, if equipped).
- F. Using the 2½" muffler clamp, supplied with kit, tighten the X-Pipe manifold extension tubes to the X-pipe.
- G. Connect the battery cable.

When you have finished installing your **FLOWTECH Off-Road "Racing Only" X-Pipe**, take the vehicle for a road test. Listen carefully for any exhaust leaks or other strange noises and make corrections. When the vehicle has been driven for a few days, retighten the bolts.

How did we do? Your questions and input are always welcome at **FLOWTECH**. Our technical services department is open Monday through Friday, during the hours of 8:30 AM until 4:30 PM Central time. We can be reached at:
