

NEW PRODUCT RELEASE (2006-14)

2005-06 MUSTANG GT HIGH-FLOW AEROCHAMBER MUFFLER

AVAILABLE: NOW

PRODUCT DESCRIPTION

Now by popular request we offer our new 05-06 Mustang GT Aerochamber Muffler Set in Hooker's classic black. Keep up the street sleeper look and enhance your Pony's performance with the best flowing performance mufflers anywhere. Unlike most of the competition, Hooker gets it right by upgrading the classic sound of a small block Ford with a deeper tone and no annoying resonance (drone).

These mufflers are constructed of sturdy aluminized steel and finished off with high-temperature flat black paint.

The tips are not included so you can select your own performance look. See our catalog for a complete selection of resonated and single wall stainless steel tips. The 2.5" inlet/outlet tubes are configured to make this muffler set a direct, bolt-on replacement for the heavy, ugly factory cans.

Unleash the performance potential of your new Mustang exhaust system with a set of Hooker full length headers (6233HKR/6233-1HKR) and high performance X-pipe (16684HKR/16784HKR).

The configuration matches up with the factory mufflers: offset in/center out.

KEY FEATURES AND BENEFITS

- Cases fully welded for long life and to prevent annoying "drumming" harmonics at highway speeds
- P Clamp connectors provide leak-free seal
- Aerodynamically designed internal chambers for the lowest backpressure and reduced turbulence
- More torque and horsepower potential than many leading competitors
- Throaty powerful sounds with no drone under load
- Compact Case Dimensions: 4.75"Hx10.25"Wx14"L

COMPETITOR CROSS REFERENCE

- JBA aluminized **50-2627**
- Flowmaster aluminized **17410**

TARGET MARKETS

- 05-06 Mustang owners
- Street performance
- Drag & Road racing
