- #10 SEM screw (qty. 6)
- U-Clip (qty. 4)
- Paint Protection Film (1 set)
- Instruction sheet

NOTE: It may be necessary to remove the rear wheels depending on the tools being used for installation. Clean and degrease the mud guard location area on the rear fender of the vehicle before installation.

- 1. Remove existing fasteners from locations A and C (Figure 1).
- Attach mud guard with a #10 screw through mud guard, fender, liner and into the U-Clip at location A and C (U-Clip is used as a nut and placed on the back of the liner) check fit and alignment before tightening (Figures 1 & 2).
- 3. Using mud guard as a template, center punch, drill 1/8" hole and install #10 screw at location B (Figure 1).

PAINTING INSTRUCTIONS

Note: If painting mud guards, perform a mud guard test fit to ensure correct fit and application prior to painting.

- 1. Clean mud guard with a soap and water solution to remove dirt and other contaminates.
- 2. Sand painting surface with 320 grit sand paper.
- 3. Apply a coating of flexible primer-adhesion promoter.
- 4. Apply a flexible paint as directed by the paint manufacturer.

PAINT PROTECTION FILM - INSTALLATION INSTRUCTIONS

NOTE: The Paint Protection Film is a precut template of film used to protect the mud guard mounting surfaces of your

fenders against wear. The templates (left and right side) can be removed from the backing liner by folding the

liner at the center cut of the template, separating the film sides and peeling the film templates from the backing

liner.

- 1. Position mud guard on fender to indicate placement location of paint protection film.
- 2. Clean the placement area of fender with a clean cotton cloth and a petroleum distillate based cleaner such as DuPonts Prep-Sol Brand Solvent Cleaner or 3M Brand Adhesive Cleaner and dry.
- 3. Mix a wetting solution of 1 pint of water with 4 drops of liquid dishwashing detergent.
- 4. Mark correct position of film by placing mud guard against fender. Make sure film extends beyond edge of mud guard contour a minimum of an 1/8".
- 5. Remove protection film from liner and flood adhesive side of film with wetting solution (use a spray bottle or sponge).
- 6. Thoroughly wet film placement location of fender with wetting solution.
- 7. Position the adhesive side of film on fender and flood with wetting solution.
- 8. Check location of film with mud guard and reposition as necessary.
- 9. Using a sponge, squeegee any air bubbles and wrinkles from film.
- 10. Allow film to dry before installing mud guard.
