

INSTALLATION INSTRUCTIONS

Part Number: E-2014

This filter fits: SEE CATALOG FOR CURRENT APPLICATIONS

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Filtercharger® seals properly.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

INSTALLATION:

1. Remove the screws that fasten the airbox lid to the airbox base.
2. Remove the airbox lid from the vehicle, then remove the filter bracket. **(See fig. 1)**
3. Remove the dirty air filter.
4. Wipe out any dirt or dust that may be inside the air filter housing.
5. Install the K&N® FILTERCHARGER® into the airbox base by first applying gentle pressure to the base side, then sliding the top tabs behind the ribs in the air box. **(See fig. 2)**
6. Once filter is installed, re-install the filter bracket and tighten the screw down completely. **(See fig. 3)**
7. Install the airbox lid back onto the airbox base, making sure that the filter is seated properly, and re-fasten the screws. **(See fig. 4)**

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.

CLEANING:

K&N Engineering, Inc., suggests checking the air filter element periodically for excessive dirt build-up. Depending on your driving conditions, we recommend cleaning your air filter every 50,000 miles. To clean and re-oil, purchase our filter Recharger® service kit, part number 99-5050 or 99-5000 and follow the easy instructions.
