

INSTALLATION INSTRUCTIONS

Part Number E-9209

This filter fits: **See current K&N catalog for complete listing**

FREE K&N DECAL** To register your warranty, please see us online at knfilters.com/register. **FREE K&N DECAL

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedures **MUST** be followed to ensure the proper fit and seal of the K&N Filtercharger®.

1. Unfasten the four air filter housing clips and remove the center hold down nut.
2. Lift the air filter lid out of the way and remove the dirty filter.
3. Wipe out any dirt or dust from the inside of the air filter housing being careful not to get any dirt into the carburetor.
4. Install the K&N FILTERCHARGER into the air filter housing base. Make sure to align the tang on the air filter to the slot on the housing base. (See Fig 1)
5. Make sure the outer edge of the filter is seated into the seal on the base by pressing down on the filter around the outer edge. (See Fig 2)
6. Re-install the air filter lid, fasten the four air filter housing clips and re-fasten the center hold down nut.

These instructions must be followed every time the filter is serviced, otherwise the filter may not seal, and damage to the engine could result.
