

## Care and Cleaning

To keep your billet grille looking their best, we recommend using only mild soap and water and a soft cotton cloth to wash and dry it. Use of rough cleaning agents or cloths may scratch or dull your billet grille.

Should your billet grille become scratched or dull, we recommend TRENZ® Metal Polish to bring back the mirror finish. There are three grades of TRENZ® Metal Polish (Coarse, Medium and Fine) that will help you keep your billet grille looking brand new. Select the TRENZ® Metal Polishes best for your needs:

1. Course (Red) Polish – For severe scratches and pitted problems.
2. Medium (Green) Polish – For light scratches and dulling problems.
3. Fine (White) Polish – To bring back the mirror finish.

TRENZ® Metal Polish can be used on all metal products, including aluminum, stainless steel, brass and copper. If you have additional questions or concerns on the maintenance of your Lund® billet grille, please call us at 800-328-5863. You may also use high quality commercially available polish recommended for aluminum accessories.

## Congratulations!

You have purchased one of many quality Lund® branded products offered by Lund International, Inc. We take the utmost pride in our products and want you to enjoy years of satisfaction from your investment. We have made every effort to ensure that your product is top quality in terms of fit, durability, finish and ease of installation.

Billet Grille

16 - 1/8 x 1/2" (R2) Pop Rivets

## Tools Required

Safety Glasses  
and Gloves

Die Grinder

Drill with  
1/8" Drill Bit

Rivet Gun

File

## Shipping Note

Sometimes the billet products get bent in the shipping process. You may need to hand bend them to attain the desired shape.

## Installation Steps

Remove the stock grille shell from the vehicle. Use a die grinder to remove the stock plastic bar grille.

1

Use a file to smooth the rough edges. After the surface is smooth, you may want to spray paint the cuts with a flat or gloss black. Let the paint dry.

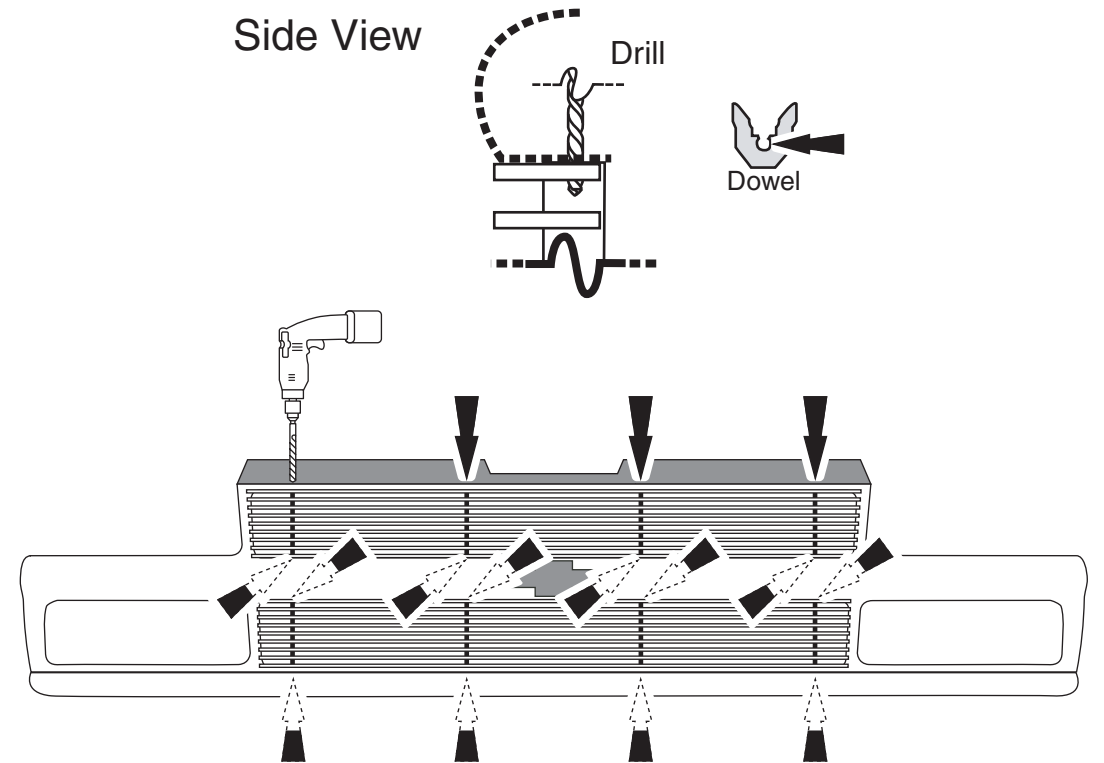

2

Insert the billet grille into the front of the grille shell. Make any small adjustments necessary for a proper fit.

3

Drill a 1/8" hole where each dowel lines up with the plastic grille shell.

4

Rivet the billet grille to the grille shell using the provided rivets. Make sure everything is secure and reinstall the stock grille shell.
