

Removal of Stock System:

1. Apply a penetrating lubricant liberally to all exhaust fasteners, hangers and rubber insulators.

2. Remove the three (3) nuts securing the extension pipe flange to the overaxle pipe.

Refer to Figure 1.

3. Remove the factory over-axle/tail pipe.

4. Loosen the three (3) nuts securing the extension pipe to the flange directly behind the exhaust filter and remove the extension pipe. **Refer to Figure 2.**

Figure 3

Installation of MBRP Inc. Performance Exhaust:

1. Feed the **Over Axle Pipe** up over the axle and install the hanger into the factory insulator **Refer to Figure 3.**

Figure 5

Figure 7

Figure 8

Figure 9

3. Install the new **Gasket** onto the rear of the DPF. **Refer to Figure 5.**

4. Cut the **Extension Pipe** to the appropriate length for the installation vehicle. **Refer to Figure 6.**

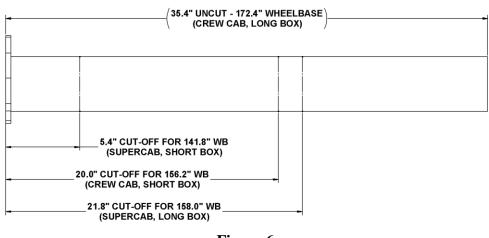

Figure 6

5. Slide the **Hanger Clamp** over the **Extension Pipe** and install the hangers into the rubber isolators.

6. Install the **Extension Pipe** into the **Over Axle Pipe**. **Refer to Figure 7.**

7. Install the **Extension Pipe** onto the DPF using the supplied, or factory hardware depending on the vehicle year. **Refer to Figure 8.**

8. Snug, but do not fully tighten the **Hanger Clamp** until all of the exhaust system is aligned. **Refer to Figure 9.**

Figure 10

Figure 11

8. Place the **Band Clamp** onto the **Over Axle Pipe** and install the **Dual Outlet Tail Pipe** onto the **Over Axle Pipe**. Snug, but do not fully tighten until all of the exhaust system is aligned. **Refer to Figure 10.**

9. Align the exhaust as required. Starting at the front of the exhaust, tighten all clamps, hangers and connections.

10. Install the **Exhaust Tips**. Single rear wheel owners may wish to trim the length of the tail pipes to suit. The Tail Pipes are purposely left long for dual rear wheel applications. **Refer to Figure 11.**

11. Check along the whole length of the exhaust system to ensure that there is adequate clearance around the spare tire, fuel and brake lines or any wiring. If any interference is detected relocate or adjust.

12. It is recommended to tack weld each joint, including the **Exhaust Tips** to ensure vibrations do not allow any pieces to become detached.

Congratulations! You are ready to begin experiencing the improved power, sound and driving experience of your *MBRP Inc.*, performance exhaust system. We know you will enjoy your purchase.
