07-11 Jeep Wrangler JK 4" & 6" Long Arm Suspension Lift Installation Instructions

REQUIRED TOOL LIST:

- Safety Glasses
- Metric / Standard Wrenches & Sockets
- Allen Wrenches
- Drill & Assorted Drill Bits
- Grinder / Cut Off Wheel
- Pipe Wrench
- Floor Jack
- Jack Stands
- Measuring Tape
- Torque Wrench

Before beginning the installation, thoroughly & completely read these instructions & the enclosed driver's WARNING NOTICE. Affix the WARNING decal in the passenger compartment in clear view of all occupants. Please refer to the Parts List to insure that all parts & hardware are received prior to the disassembly of the vehicle. If any parts are found to be missing, contact SKYJACKER® Customer Service at 318-388-0816 to obtain the needed items. If you have any questions or reservations about installing this product, call SKYJACKER® Technical Assistance at 318-388-0816.

Make sure you park the vehicle on a level concrete or asphalt surface. Many times a vehicle is not level (side-to-side) from the factory & is usually not noticed until a lift kit has been installed, which makes the difference more visible. Using a measuring tape, measure the front & rear (both sides) from the ground up to the center of the fender opening above the axle. Record this information below for future reference.

Driver Side Front: _____

Passenger Side Front: _____

Driver Side Rear: _____

Passenger Side Rear: _____

IMPORTANT NOTES:

- The draglink must be adjusted to center the steering wheel before the vehicle is driven. Failure to do so will cause computer errors, odd handling characteristics, & poor performance.
- Replacement front & rear drive shafts are recommended, contact Skyjacker for more info.
- This lift is determined from the amount of lift to the front of the vehicle, while only lifting the rear to a position level with the front.
- If larger tires (10% more than the stock diameter) are installed, speedometer recalibration will be necessary. Contact your local Jeep dealer or an authorized dealer for details.
- After installation a qualified alignment facility is required to align the vehicle to factory specifications.

Component Box Breakdown:

Part #: JK40LA (4" Lift)

Item #	Description	Qty
JK40RBS-S	JK 4" REAR BUMP STOP BRKT	2

Front Installation:

1. Park the vehicle on flat, level ground & set the emergency brake.
2. Raise the front of the vehicle & support the frame rails using jack stands.
3. Disconnect the front sway bar end links using a 18mm socket. Disconnect the front track bar using a 21mm socket. (See Photo # 1)
4. If installing a Skyjacker steering stabilizer Part # 7003, remove the OEM steering stabilizer using a 18mm socket. (See Photo # 2)
5. Disconnect the front shocks using a 18mm socket. Remove the front tires / wheels & remove the OEM front coils. (See Photo # 3) Remove the OEM front shocks.
6. Locate the OEM lower control arm mount on the frame. **Note:** It will be necessary to modify these mounts to allow for the installation of the Skyjacker lower control arm brackets. Remove the OEM automatic transmission skid plate & remove the lower control arm, one side at a time.
7. Using a grinder, remove the weld attaching the inner mounting plate to the frame. All that will be left is the single mounting plate under the frame. (See the Arrow in Photo # 4)

Photo # 1

Photo # 2

Photo # 3

Photo # 4

8. Using a transmission jack, support the rear of the transfer case. Disconnect the transmission from the OEM cross member. Raise the transmission / transfer case approx. 2". This will allow easier access around the exhaust to install the new Skyjacker front control arm brackets.

9. Remove the inner most mounting bolt on the transmission cross member using a 18mm socket. (See Photo # 5)

10. Place the OEM cross member bolt through the back of the new Skyjacker bracket & install. (See Photo # 6)

11. Install the OEM skid plate bolt that was removed in Step # 6. (See Photo # 7)

12. Install the supplied 9/16" x 1 1/2" fine thread bolt, washers, & nut at the OEM control arm position. (See Photo # 8)

13. With all bolts tight, mark & drill the new location on the outside of the frame using a 1/2" drill bit. (See Photo # 9) Once drilled, install the 1/2" x 1 1/2" fine thread bolt, washers, & nut. **Note:** It may be necessary to remove the lower bolt first to allow the installation of the new outer frame bolt. **Note:** The passenger side control arm can be installed along with the bracket. If not, it will be necessary to raise the transmission again later to install the control arm.

14. Locate the new Skyjacker front bump stop. Place the bump stop on the center of the bump stop pad located on the front axle. Mark & drill using a 25/64" drill bit. (See Photo # 10)

6" Kits: Remove the upper OEM bump stop & reinstall the new Skyjacker poly bump stop.

Photo # 5

Photo # 6

Photo # 7

Photo # 8

Photo # 9

Photo # 10

15. Place the bump stop inside the coil spring & install the coil spring. Attach the bump stop to the axle using the 3/8" X 4" button head bolts with one washer under the nut. (See Photo # 11)

16. Locate the OEM front track bar mount & place the new Skyjacker relocation bracket inside the OEM mount. Drill the outer OEM holes all the way through the rearward plate using a 7/16" drill bit. (See Photo # 12) Attach the bracket at the outer two locations using the 7/16" x 2 1/2" fine thread bolts, washers, & nuts. Attach bracket at the OEM location using the OEM bolt. Let the weight of the frame down onto the new Skyjacker coils & attach track bar to new bracket using the 14 x 80mm bolt, washers, & nut.

17. Remove the three upper left differential cover bolts. (See Photo # 13)

18. Hold the new Skyjacker differential bracket (D30 or D44) up to the differential. (See Photo # 14) Place the thick 5/16" washers between the new differential bracket & differential. (See Arrow in Photo # 15) Attach using the 5/16" x 1" coarse thread bolts, flat washers, & lock washers. (See Photo # 15) **Note:** Do not tighten at this time.

19. Attach the new Skyjacker rear brace to the upper rear mounting bolt of the track bar bracket. (See Photo # 16)

Photo # 13

Photo # 14

20. Install the new Skyjacker support brace between the new differential bracket & rear mounting bolt of the track bar bracket using the original 14mm hardware, 5/16" x 1" fine thread bolts, flat washers, & nuts. (See Photo # 17 & # 18)
Note: Do not tighten at this time.

21. Clamp the new rear brace to the OEM spring perch & drill through the new rear brace & OEM spring perch using a 7/16" drill bit. Install the 7/16" x 1" fine thread bolt, washers, & nut to the perch & tighten at this time. (See Photo # 19)

22. Once the 7/16" hardware has been tightened, complete the install by tightening all remaining 14mm & 5/16" hardware.

23. Assemble the new Skyjacker sway bar end links using the supplied steel sleeves. Attach the eyes using the 1/4" snap pins. Attach the end link to the axle using the OEM hardware. Attach to the sway bar using the 1/2" x 2 1/2" button head bolt & use one large USS washer under the nut. Re-attach front drive shaft. (See Photo # 20)

24. If installing a Skyjacker steering stabilizer Part # 7003, install at this time. (See Photo Below).

25. Locate the new Skyjacker lower control arms. (Fronts are shorter than the rear) Install the supplied poly bushings & sleeves. It is recommended to apply a thin coat of lithium grease to the bushings & sleeves prior to installation. Be sure to install the 1/4" drive in grease fittings. These are easily driven in with the use of a 1/4" socket. Install the supplied 1 1/4" rod end & jam nut. Be sure to install the 14mm bolt inserts.

26. The recommended pre-set length of the control arms are:

4" Measurements

Lower Front should be set @ 31 1/4"

Lower Rear should be set @ 34 7/8"

Upper Front should be set @ 18 3/8"

Upper Rear should be set @ 18"

6" Measurements

Lower Front should be set @ 32"

Lower Rear should be set @ 35"

Upper Front should be set @ 18 3/4"

Upper Rear should be set @ 18 1/16"

The final length will need to be set by a qualified alignment facility.

Photo # 21

27. Install the lower control arms using the OEM hardware. (See Photo # 21 & # 22) Install the arms with the bend up & towards the middle of the vehicle. Once installed, tighten the jam nut. Be sure that once tightened, the rod end sits square inside the mount. With the lower arms installed, lower the transmission & re-attach to the OEM cross-member.

Photo # 22

28. With the lower control arms installed, remove the OEM upper arms. It will be necessary to cut off the OEM bolt at the frame due to it hitting the exhaust when trying to remove. Install the new Skyjacker upper arms using the same process as the lower. Install using the 12mm I.D. bolt inserts. Attach to the frame using the 12mm x 80mm bolts, washers, & nuts. (See Photo # 23)

Photo # 23

29. **6" Kits:** Remove the front OEM brakelines & install the new Skyjacker stainless steel braided lines. Attach to the frame using the 90 degree brackets supplied. Attach using the OEM hardware. (See Photo # 24) Install the new Skyjacker front shocks.

Photo # 24

30. Disconnect the drag link from the OEM pitman arm. Using a pitman arm puller, remove the OEM pitman arm & install the new Skyjacker pitman arm. (See Photo # 25) Install the tires / wheels & lower the vehicle to the ground.

Photo # 25

Rear Installation:

31. Raise the rear of the vehicle & properly support the frame rails using jack stands. Remove the OEM rear shocks using a 16mm socket. (See Photo # 26)
32. Disconnect the rear track bar bracket from the axle using a 21mm socket. (See Photo # 27) Disconnect the rear sway bar end links using a 18mm socket.
33. Disconnect the ABS line from the frame & disconnect the brake line from the frame. (See Photo # 28) Lower the axle down & remove the OEM rear coils.
34. Place the new Skyjacker rear track bar relocation bracket over the OEM bracket on the axle. With the bracket seated flush, clamp the bracket in place (mark using a center punch) & drill the new center mounting holes using a 15/32" drill bit. (See Photo # 29)
35. Install the supplied 7/16" x 1" fine thread bolt & nut. Use one 7/16" washer under the nut. (See Photo # 30)
36. It will be necessary to drill through the driver side bottom of the OEM bracket & through the new Skyjacker bracket. Drill using a 17/32" drill bit. Once drilled, install the supplied 1/2" x 1 1/4" fine thread bolt & nut. Use one washer under the bolt. Install the 9/16" x 3 1/2" bolt, washers, & nut at the bottom location being sure to use the supplied crush sleeve. (See Arrow in Photo # 31)
37. Remove the three upper left differential cover bolts. (See Photo # 32)

38. Attach the new track bar brace to the differential using the 5/16 x 1" coarse thread bolts. **Do not tighten at this time.** The end of the bracket should be between the Skyjacker track bar bracket & the coil spring. Use the thick, gold plated 5/16" washer between the bracket & the differential cover. Use a 5/16" lock washer under the head of each bolt. (See Photo # 33 & # 34) **Do not tighten at this time.**

39. Attach the brace to the front side of the Skyjacker track bar bracket between the bracket & the coil spring. **Do not tighten at this time.** (See Photo # 35)

40. Torque the 5/16" bolts at the differential & the 14mm bolt on the track bar to OEM specifications.

41. **6" Kits:** Remove the upper OEM bump stops & install the new Skyjacker bump stop. Install the new Skyjacker Softride® rear coils. (See Photo # 36) Be sure to re-use the upper OEM rubber isolator pad.

42. Attach the new Skyjacker rear bump stops to the OEM location on the axle using the 5/16" x 1" fine thread bolts, washers, & nuts supplied. (See Photo # 37) Be sure to install the bump stop so that the angled end is towards the rear.

43. Let the weight of the vehicle onto the coil springs. Install the new Skyjacker sway bar end links using the supplied 5/8" hourglass bushings & steel sleeves. Attach using the 1/2" x 2 1/2" button head bolts & nuts. One large USS washer will be used under the head of each bolt with the smaller SAE washer under the nut. (See Photo # 37)

44. Attach the track bar to the new Skyjacker bracket using the 9/16" x 3" fine thread bolt, washer, & nut. See the included track bar brace & instructions at this time. **4" Kits:** Be sure to use the upper mounting location on the new Skyjacker bracket. One washer will be used under the head of the bolt. Be sure to install the bolt from the front side toward the rear.

45. **6" Kits:** Remove the OEM rear brakelines & install the new Skyjacker brake lines. Install using the 90 degree bracket supplied. The bracket will attach to the OEM location on the frame using the OEM hardware. (See Photo # 38A) **4" Kits:** Will relocate the OEM brake line on the frame using the brackets & 1/4" hardware supplied. Position the brackets so the bend is under the frame. Make sure there is space between the hard brake line & the frame rail. (See Photo # 38B)

46. Remove the driver side lower control arm & disconnect the exhaust behind the catalytic converter. **Note:** It will be necessary to disconnect the exhaust hangers to allow for drilling of the mounting hole inside the frame rail.

47. Using a cut off wheel, cut the welds that attach the OEM lower control arm brackets to the frame & remove 1" from the bottom of each side of the body mount bracket. (See Photo # 39 & Arrows # 40) Once removed, grind the frame smooth.

48. Locate the new Skyjacker lower control arm brackets & crush sleeves. Install the crush sleeve at the OEM location in the frame. (See Photo # 41)

49. Install the new control arm bracket on the driver side using the 1/2" x 4 1/2" fine thread bolt, washers, & nut. (See Photo # 41)

50. With the bracket seated up flush against the frame rail, mark the front mounting locations on both the inside & outside of frame rail. (See Photo # 42)

51. Lower the bracket & drill the mounting location from each side of the frame rail using a 1/2" drill bit. (See Photo # 43)

52. Once drilled, install the supplied 1/2" x 4 1/2" fine thread bolt, washers, & nut. (See Photo # 44)

53. Repeat this process on the passenger side. **Note:** It will be necessary to disconnect the drive shaft & remove the fuel tank to allow access to the frame. Attach the passenger side bracket using the 1/2" x 4" counter sunk bolt for mounting the rear of the new bracket & the 1/2" x 4 1/2" counter sunk bolt for mounting the front of the new bracket. The bolts will install from the inside of the frame rail. (See Photo # 45) Use one washer & nut on the outside of the frame. Once installed, reinstall the fuel tank & drive shaft.

54. Install the new Skyjacker lower control arms using the same process as the front arms. (Installing the arms with the bend up & towards the middle of the vehicle) (See Photo # 46)

55. Remove the upper rear arms & install the new Skyjacker arms. (Install the arms with the offset bend towards the inside of the vehicle)

56. Install the new Skyjacker shocks, tires / wheels, & lower the vehicle to the ground. (See Photo # 47)

FINAL NOTES:

* **The draglink must be adjusted to center the steering wheel before the vehicle is driven. Failure to do so will cause computer errors, odd handling characteristics, & poor performance.**

* After the installation is complete, double check that all nuts & bolts are tight.

* Check to ensure there is adequate clearance between all rotating, mobile, & fixed members. Check clearance between the inner side wall of the tires.

* Ensure there is adequate clearance between exhaust, brake lines, fuel lines, fuel tank, floor board, & wiring harnesses. Check the steering gear for interference & proper working order. Inspect brake lines for damage & adequate clearance. Test the brake system.

- * With the vehicle on the ground, cycle the steering lock to lock & inspect the steering, suspension, drive line, & brake line systems for proper operation, tightness, & adequate clearance.
- * Have the headlights re-adjusted to the proper settings.
- * Re-alignment is necessary. Have a qualified alignment center re-align the vehicle to the OEM specifications.

- The above specifications are not to be used when the bolt is being installed with a bushing.

Seat Belts Save Lives, Please Wear Your Seat Belt!

Jesus Forgives,
Rocks Don't

Jesus Christ Died For You.

John 3:16

For God so loved the world that He gave His only Son, so that everyone who believes in Him should not perish, but have everlasting life.
Romans 3:23

For all have sinned; all fall short of God's glorious standard.
Ephesians 2:8

God saved you by his special favor when you believed. And you can't take credit for this; it is a gift from God.
Psalms 18:2

The Lord is my Rock, my fortress, and my savior; my God is my Rock, in whom I find protection. He is my shield, the strength of my salvation, and my stronghold.
Romans 10:9-10

That if you shall confess with thy mouth the Lord Jesus, and shall believe in your heart that God hath raised him from the dead, you shall be saved. For with the heart man believeth unto righteousness; and with the mouth confession is made unto salvation.

Pray This Simple Prayer:

God, I come to You admitting I have sinned against You and I need you to take control of my life. The Bible says anyone who calls on the name of the Lord will be saved. I am calling on You, Jesus. I ask that You come live in my heart and be the Lord over my life today. I do believe You died on the cross for me and came back to life to give me life! Thank You, Lord Jesus for a new life in You!

Now, go and tell somebody about your new life in Jesus, get a Bible, begin to read it, and go to a Bible believing church.

If you would like someone to pray with you, call Kenneth Copeland Ministries anytime at 800-600-7395.

Jesús murió por ti.

Juan 3:16

“Porque tanto amó Dios al mundo, que dio a su Hijo unigénito, para que todo el que cree en él no se pierda, sino que tenga vida eterna.”
Romanos 3:23

“Pues todos han pecado y están privados de la gloria de Dios.”
Efesios 2:8

“Porque por gracia ustedes han sido salvados mediante la fe; esto no procede de ustedes, sino que es el regalo de Dios.”
Salmos 18:2

“El Señor es mi roca, mi amparo, mi libertador; es mi Dios, el peñasco en que me refugio. Es mi escudo, el poder que me salva, ¡mi más alto escondite!”
Romanos 10:9-10

“9 Que si confi esas con tu boca que Jesús es el Señor, y crees en tu corazón que Dios lo levantó de entre los muertos, serás salvo. 10 Porque con el corazón se cree para ser justifi cado, pero con la boca se confi esa para ser salvo.”

Ahora dí esta simple oración:

Dios, vengo a Ti y admito que he pecado contra Ti, necesito que tomes el control de mi vida. La Biblia dice que todo aquel que invoca el nombre del Señor escapará con vida. En este momento yo clamo ante Ti, Jesús; te pido que vengas a vivir en mi corazón y que tomes el control de mi vida. ¡Yo creo que tu moriste en la cruz y resucitaste para darme vida! ¡Gracias Señor Jesús, por una nueva vida que tengo en Ti! Amen.

Ahora ve y dile a alguien sobre la nueva vida que tienes en Cristo. Compra una Biblia y empieza a leerla. Busca una Iglesia que cree en la Biblia y hazte parte de esa Iglesia.
