The Superchips Racing Dodge Diesel tuner is easy-to-use and includes up to five standard tunes with more extreme tunes available via Superchips Internet Update software. Additional features include diesel particulate filter (DPF) management, exhaust gas recirculation (EGR) management, speed limiter adjustment, diagnostic read & clear, and real time performance monitoring for over 20 PIDs, ¼-mile and 0 - 60 times.

ACTIVATING YOUR SUPERCHIPS RACING DODGE DIESEL TUNER

Your Superchips Racing Dodge Diesel tuner (part no. 2856) is loaded from the factory with up to five power levels and includes all-new purpose-built racing tunes and features.

Most of the Superchips Racing Dodge Diesel tunes and features work right out of the box, but the all new, race only tunes and features require activation. Overall it should only take a few minutes.

2. Download and install Superchips Internet Update software on your personal computer.
3. Run the software and plug your tuner into your computer using the included USB cable.
4. Review and accept the emissions and safety liability waver.
5. After completing the online update at your PC, remove the tuner. Race tuning is now unlocked and ready for use on your truck.
