### ***BUMPER INSERT***

#### **Tools Required:**

Slotted Screwdriver  
Phillips Screwdriver  
5/16" Wrench

#### **Part List:**

1 Bumper Insert  
2 #8 x 1 Screws (#6 Head)  
2 #8 U-Nuts  
2 1.5" J Hooks

### **Read and understand instructions before attempting installation**

#### **Step 1.**

Remove the factory grille shell; use a screwdriver to unscrew the plastic fasteners along the top of the grille. Next, lightly pull the top of the grille assembly forward; use a slotted screwdriver to depress the clips on each end of the grille. Use your fingers to depress the molded clips along the bottom of the grille; remove the grille.

#### **Step 2.**

Slide the u-nuts over the hole in J hook brackets. These brackets secure the grille to the plastic crossbars in the bumper opening. Center the billet into the opening. The grille has two tabs welded to the back. From the front, insert a screw into each tab. From the back; slide a J hook on each screw; secure the brackets with the lock nuts provided. Use the screws to attach the u-nut side of the bracket. Wrap the hook around the horizontal crossbars in the opening. Tighten the hardware.

#### **Step 3.**

Re-install the upper grille onto the vehicle. *Thank you for purchasing a T-Rex Billet Grille. 2/2/07*
