

**INSTALLATION INSTRUCTIONS**  
**TAILLIGHT GUARD**  
**94-01 DODGE RAM**  
**PART # 39-3060/39-3065**

**PARTS LIST:**

|   |                                 |
|---|---------------------------------|
| 1 | Driver/Left Taillight Guard     |
| 1 | Passenger/Right Taillight Guard |

**TOOLS REQUIRED:**  
- T25 Torx Wrench

**PROCEDURE:**

- 1. REMOVE CONTENTS FROM BOX. VERIFY ALL PARTS ARE PRESENT. READ INSTRUCTIONS CAREFULLY BEFORE STARTING INSTALLATION.**
- Open the tailgate and remove the driver side screws holding the taillight (**Figure 1**).
- Grasp the taillight and pull out gently. Pull the taillight housing out just enough to slide in and hook the Support Bracket to the edge of the taillight housing, then push taillight assembly back into place (**Figure 2**). **NOTE:** Be sure to pull straight out to avoid possible damage. This is the same procedure required to change a burn out taillight in the assembly. For more info see owner's manual on replacing burn taillight bulbs.
- Align the Mounting Brackets to the factory mounting holes and fasten the assembly using the factory screws removed in step two (**Figure 3**). **NOTE:** If Mounting Brackets or Support Brackets don't fit properly, they can be adjusted to fit properly using a pair of pliers. Make sure to protect the finish on the mounting tabs when adjusting.
- Adjust Taillight Guard properly, and then tighten all hardware properly.
- Repeat steps 2 – 5 for passenger side.
- Do periodic inspections to the installation to make sure that all hardware is secure and tight.

**To protect your investment,** wax this product after installing. Regular waxing is recommended to add a protective layer over the finish. Do not use any type of polish or wax that may contain abrasives that could damage the finish.

**For stainless steel:** Aluminum polish may be used to polish small scratches and scuffs on the finish. Mild soap may be used also to clean the Sidebar.

**For gloss black finishes:** Mild soap may be used to clean the Taillight Guard.
