**Tools Needed**  
Flat head screwdriver  
T20 Torx  
10mm Socket and ratchet (Only for  
models with upgraded sound system)

Use your screwdriver to pop the  
plastic locks from under the light

Remove the 4 plastic wing nuts  
from the inside of the trunk

Remove the plastic covers located  
at the end of the light by pulling  
downward ( there is one on either  
side if the light)

Using your T20 Torx remove the  
screw located in the pocket  
where you removed the plastic  
cover from the last step

Pop the light up giving a gentle  
tap on both sides. Un-clip the plug  
in the center from the vehicle.

Remove the harness from the back  
of the stock light. Pull the light  
bulbs our of the harness leaving  
the reverse bulb in.

Plug the pigtails coming out of the  
Anzo light in to the sockets.  
Be sure to match the black wire  
on the same sides of the plug

Twist the sockets back into place

Reverse the steps above to  
re-install the center portion of the  
tail light

Remove the plastic wing nut from  
behind the outer tail light. Pull  
the carpet back away from the  
vehicle

Remove the plastic wing nut and  
the light plug from behind the carpet

Pull the taillight out

Wipe the inside area clean with a towel. Stick the two resistors to the car out over the way of the light.

Plug the resistors into the back of the light and reverse the steps for installation. Do this for both sides.

Check for proper function of the taillight.
