|  1/2 Hour | <div><div>1</div><div>2</div><div>3</div><div>4</div></div> 1 - Easy |

| TOOLS | | |
|---|---|---|
|  Wrench 1/2" |  Scissors |  Safety Glasses |

NOTE

Wash vehicle to ensure that no dirt or abrasive materials are caught between the truck's finish and the Tonneau Rail Frame.

Check and secure all clamps to bed frame as indicated in the installation instructions before operating your vehicle.

Tonneau cover clamps must be securely attached prior to vehicle operation.

Secure retaining straps when cover is in open position.

CAUTION

Safety glasses should be worn at all times while installing this product.

Installation Tips

Before you begin installing this assembly, read all instructions thoroughly.

For a smooth fit:

For ease in installation, the product should be installed at temperatures above 72° F. Below this temperature, the fabric may contract an inch or more, making it difficult to fit to the vehicle. It is normal for fabric to contract and wrinkle when stored in the shipping carton. Within a few days after the installation, the fabric will relax and the wrinkles will disappear.

WARNING

The buckle of each retaining strap and both clamps must be fastened securely to avoid damage to personal property or possible personal injury.

If the vehicle has an Over-the-Rail Bedliner, use a certified installer to perform the initial installation. Modifications to the Bedliner may be required.

EZ Roll Tonneau Installation Instructions

Parts List

Prior to installing tonneau: Install Rubber Pads on to Outer Clamps

Peel the backing off Rubber Pads and press firmly to place on bottom of Outer Clamps.

EZ Roll Tonneau Installation Instructions

1 Assemble Clamps

Use a 5/16" Bolt to secure an outer clamp to an Inner Clamp. Repeat on all Clamp assemblies.

2 Place Side Rails on Bed

Locate the 2 side rails. Remove the protective tape on the bottom of each rail and place the rail on the bed on each side of the vehicle.

Once the rails are on the bed, align the front edge of each Side Rail, with the inside edge of the front bulkhead.

3 Secure Tonneau Cover Assembly to Passenger Side Rail

Place the Tonneau Cover Assembly into the front pivot on the Passenger Side Rail. Engage the cover assembly latch into the slot on the Side Rail. Make sure that the cover assembly is flush against the Side Rail.

4 Secure Driver Side Rail to Tonneau Cover Assembly

Place the Driver's Side Rail into the Tonneau Cover Assembly. Make sure the cover assembly latch is fully engaged into the slot on the Side Rail and that the cover assembly is flush against the Side Rail.

EZ Roll Tonneau Installation Instructions

8 Tighten Front Clamps

Tighten the front Clamp on each side until the Lock Washer is compressed.

11 Center Rear of Frame

Push the Side Rails flush against the Rear Rail and center the rear of the Frame from side to side on the vehicle.

NOTE For proper function, it is best to leave a 1/8" gap between the Side Rail and the Rear Rail.

9 Roll Out Cover

Roll out the cover. Make sure that each bow falls between the Side Rails.

10 Secure Rear Rail To Rear Pivot Mounts

Rotate the Rear Rail into the rear Pivot Mounts on both sides. It will only latch on the driver's side.

12 Secure Remaining Clamps

Once the Frame is centered reach between the cover and the Side Rail to access the center and rear clamps. Tighten the 5/16" Bolt in the Clamp until the Lock Washer is compressed, then add 1 to 1-1/2 additional turns to reach optimum pressure. Repeat on both sides of the vehicle.

NOTE Do not remove the cover until all clamps are tight.

EZ Roll Tonneau Installation Instructions

13 Secure Sides of Cover

Fasten the loop strip sewn to the driver's side of the Tonneau Cover to the hook on the Side Rail. Pull the fabric tight across and secure the passenger side.

NOTE Make sure to keep the fabric tight across the bed to ensure a proper fit.

16 To Remove Cover – Loosen Side Rail

Loosen the front and middle clamps on the Driver's Side Rail. Pull outward on the rail until the cover disengages from the Side Rail.

14 To Remove Cover – Release Latches

Open the tailgate and pull both the drivers side latch and the passenger side latch to rear of vehicle.

15 To Remove Cover – Roll Cover

Tightly roll the Cover toward the front and attach strap to the 2 front loop attachments.

17 Remove Cover

Remove the Cover Assembly from the vehicle.

NOTE Once the Cover is removed, retighten the clamps on the Side Rail.

EZ Roll Tonneau Installation Instructions

18 Special Instructions – Bed Liners

If your vehicle is equipped with a Bed Liner that comes up over the front bulkhead, you will need to trim the seal on the Tonneau Cover Assembly. Mark the seal at each end of the of the Bed Liner and use scissors to trim the bottom, “eyelash”, part of the seal at the mark.

NOTE Only trim the bottom, “eyelash”, part of the seal.

19 Special Instructions – Tailgate Caps

If your vehicle is equipped with a Tailgate Cap, you will need to trim the seal on the Tonneau Cover Assembly. Mark the seal at each end of the of the Tailgate Cap and use scissors to trim the bottom part of the seal at the mark.

NOTE Only trim the bottom part of the seal.

Care and Maintenance of your Bestop Product

Your Bestop product is made of the finest materials available. To keep it looking new and for the maximum possible wear, it will need periodic cleaning and maintenance.

Fabric: The fabric should be washed often using soap, warm water and a soft bristle brush. Rinse with clear water to remove all traces of soap. Bestop recommends using Bestop Cleaner (part no. 11201-00) and Bestop Protectant (part no. 11202-00) for Vinyl fabric and Bestop Twill Protectant (part no. 11207-00) for Twill fabric. Bestop Cleaner and Bestop protectant are specially formulated to provide a total cleaning and protection system. Bestop Cleaner safely removes the toughest stains, will not harm vehicle finishes, is biodegradable and environmentally friendly. Bestop Protectant protects against UV-fading, cracking and hardening, and repels dust, grease, dirt and mildew.

Windows: Keep windows clean to avoid scratching. DO NOT use a brush on the windows! Wash with a water-soaked cloth or sponge and a mild dishwashing detergent. Bestop recommends Bestop Vinyl Window Cleaner (part no. 11203-00), which safely cleans and protects vinyl windows and helps prevent UV damage. NEVER WIPE THE WINDOWS WHEN THEY ARE DRY. Be careful when cleaning snow or frost from the vinyl windows since they are easily scratched and may crack at low temperatures. DO NOT roll the sides or rear window in cold weather. The windows become stiff and will crack. Cracks caused by misuse in cold temperatures are not covered under warranty.

Water: Seeping through at the seams may be stopped by applying 3-M Scotchgard® on the inside of the seams.

Snap: Keep snaps cleaned and lubricated with silicone to help prevent snaps from sticking to the studs. If a snap does become stuck to a stud, use a screwdriver and GENTLY pry apart to prevent permanent damage to the snap or the top fabric.

Zippers: Keeping zippers cleaned and lubricated with Bestop's Zipper Cleaner (part no. 11206-00) will help prevent damage and keep the zippers in smooth working condition. If a zipper opens behind the slider, the slider may have been spread apart. This problem can usually be repaired by using an ordinary pair of pliers to bring the sides back into parallel. Return slider to the end of the zipper in the normal Open position. Squeeze lightly at first and test the zipper. If the zipper continues to remain open squeeze more firmly with the pliers and try the zipper again. Repeat this procedure until the zipper operates correctly.
