### Utility Vehicle Mirror

#### ❖ Mounting the Mirror

This interior mirror is designed to install on the roll cage section above the instrument panel. Simply remove both fasteners on the clamping bracket on the roll cage, insert fasteners and tighten.

This roll cage clamping bracket was designed for a 1.75 inch diameter roll cage. Early UTV's came with a 1.50 inch diameter roll cage. Two pieces of weather resistant spacer foam is provided for those UTV's equipped with a 1.50 inch roll cage. Simply insert the two pieces of spacer foam between the roll cage and bracket for a secure fit.

#### ❖ Maintaining the Mirror

The UTV mirror is designed to withstand fresh and salt water spray, hot and cold weather. Clean with soap and water when necessary.

The mirror head attaching screw may become loose over time. Tighten the stainless steel screw as needed.

#### ❖ Using your UTV Mirror

Objects in the mirrors are closer than they appear. Practice getting used to this difference in distances in the mirror.
