

CIPA-USA
Optic Glow Mirror

Installation Instructions

1. Remove the inner door panel of your vehicle (refer to your vehicle's service manual for details)
2. Peel back the insulator pad (or pry out the insulator foam) to access the side mirror's retaining nuts
3. Remove the three retaining nuts and detach the mirror from the doorframe
4. Install the new Optic Glow mirror in a reverse procedure of removal using the original nuts if applicable
5. Run the plug (wires) through the access hole of the vehicle's door
6. Connect the red wire of the mirror to the power source for your vehicle's running lights or turn signals (whichever you prefer).
7. Connect the black wire of the mirror to a good ground
8. Adjust the angle of the mirror for maximum viewing

Note: Check Local Laws for Lighting Restrictions!
