RUBBER ISOLATOR
REMOVAL DIAGRAM

This technique can be used if and Exhaust Hanger Removal Pliers is not available.

Using a 5/8" open end wrench, slide the wrench up to the rubber isolator, cradling the hanger rod as shown. Next place the flat edge of a pry bar between the wrench and the hanger stop or hanger rod. Then simply rotate the pry bar toward the wrench to remove the rubber isolator.

Note: Using a spray lubricant or soapy water on the hanger rod and the rubber isolator helps removal.

INSTALLATION STEPS

1. Remove underbody panel by removing (7) push-button fasteners (if present) and return to owner.

2. Remove (2) 8mm existing fasteners from frame as shown.

3. Lower exhaust by removing (3) rubber isolators.

(NOTE: Spraying a lubricant or soapy water on the metal hanger rod and rubber isolator helps removal.)

4. Raise hitch into position over exhaust and install supplied and existing fasteners as shown.

5. Torque all 8mm fasteners to 23 lb-ft, all 3/8" fasteners to 45 lb-ft, and all 5/8" fasteners to 210 lb-ft.

6. Re-install rubber isolators and exhaust removed in step 2.

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.
