Trinity Update Instructions

1. Before updating your Trinity, you **MUST** restore the stock tune to the vehicle. This is accomplished by selecting the 'original backup' option from the Performance Menu of your Trinity.
2. Download the DSDownloader program to your PC from the CD provided with the Trinity or from here on our website:
   Trinity downloads page
3. Launch the DSDownloader program on your PC once it has been installed.
4. Select Trinity from the tool communications screen then click 'Continue'.
5. Connect your Trinity to the PC using the supplied USB cable.
6. When the DSDownloader finds your Trinity, it will display a message that the tool was found, click 'Close'.
7. At this point, if you have not yet registered your Trinity, DSDownloader will ask you if you wish to register, choose yes, and complete the registration form. If you have already registered, skip to the next step.
8. DSDownloader will query your Trinity to see what revision it is on and what application you have selected. It will then check the website to see if there are any new Full or Incremental updates available for you.
9. A message will be displayed 'A new full update is available for: (selected application)' Clicking 'OK' will download the file from our site automatically.
10. Once the file is saved to your PC, DSDownloader will ask if you would like to send .crom file to tool, choose 'YES'. It will send the update to the Trinity. Once the transfer is complete, the Trinity will reboot.
11. Once the Trinity reboots, click Options/Legacy connect on the DSDownloader, then click Options/Auto Connect. The DSDL will re-query the Trinity and check to see if there are any incremental updates available.
12. A message will appear saying a new incremental update is available for your application, click 'OK' to download.
13. Once it has downloaded, click 'OK' to send crom file to tool.
14. Once the tool reboots, select your vehicle from Options/Change vehicle type, then you may reinstall the Trinity in your vehicle.
