Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no serious modifications will be required. However the following procedure MUST be followed to ensure a proper fit and seal of the K&N Air Filter.

Installation

- 1) Remove the airbox lid by releasing the two hold down clips.
- 2) Remove the stock air filter.
- 3) Wipe any dirt out of the lid and base. The airbox lid must be clean and dry so that the gasket will stick to it.
- 4) Apply the supplied self-sticking gasket around the edge of the airbox lid. (Fig 1)
- 5) Install the K&N Air Filter.
- 6) Re-install the airbox lid and clamp down the holding clips.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.

Apply gasket around edge of airbox.
