**+5.41 hp**

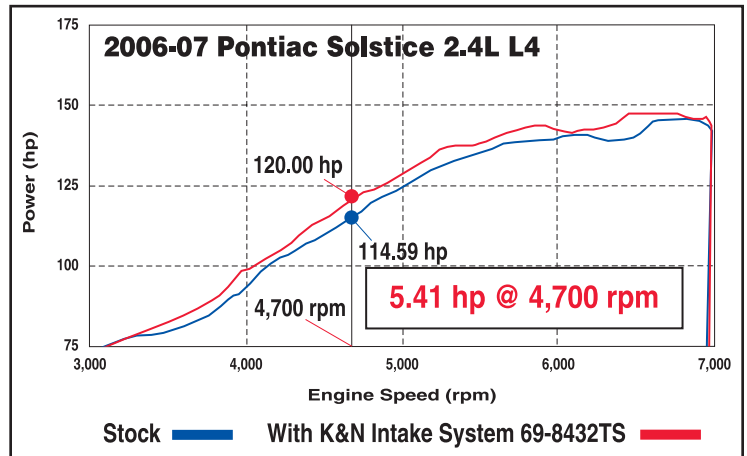

**K&N High-Flow Intake System Adds 5.41 Horsepower to the 2006-2007 Pontiac Solstice & Saturn Sky 2.4L L4**

The K&N High-Flow Intake System for the 2006-2007 Pontiac Solstice 2.4L and 2007 Saturn Sky 2.4L (part no. 69-8432TS) provides an increase of 5.41 hp @ 4700 rpm to the rear wheels. To achieve a performance increase, K&N replaces the stock intake assembly; air box and air filter with a new system that draws air through a cone-shaped K&N High-Flow Air Filter. The new filter increases airflow and filtering capacity and never needs to be replaced. Protecting the cone-shaped air filter and isolating it from engine heat, is a powder coated steel heat shield. As it passes through the filter, air travels through a metal intake tube that is formed and shaped to drive a more laminar flow of air to the engine compared to the stock configuration. Retaining the use of the OE Mass Air Sensor, which attaches to the new intake tube, the complete new K&N Intake System can be installed in approximately 90 minutes.

**#69-8432TS**

The 69-8432TS is currently available where quality performance is sold, is backed by the same K&N Million Mile Limited Warranty® as all K&N OE Replacement Air Filters and has an MSRP of \$449.

Part#	Application	Available	MSRP
69-8432TS**	2006-07 Pontiac Solstice 2.4L L4	Currently Available	\$449.00
69-8432TS**	2007 Saturn Sky 2.4L L4	Currently Available	\$449.00
