

# INSTALLATION INSTRUCTIONS

## PART NUMBER: VF2085

This Assembly Fits:

SEE CATALOG FOR CURRENT APPLICATIONS

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

- 1.) Open glove box and carefully squeeze sides of the glove box to gain access to the cabin filter housing. (Figs.1 – 3)
- 2.) Locate the cabin air filter housing & remove filter cover. (Fig. 4)
- 3.) Remove the dirty cabin filter. NOTE: Remove any debris that may be present inside the cabin filter housing (Fig. 5)
- 4.) Install K&N Cabin Filter. (Fig.6) With the cabin filter installed, clean an area on the housing and apply the K&N stop Decal. This will help notify others that this is a reusable cabin filter. Reverse steps 1-4 to complete cabin filter installation.

Please visit our website [knfilters.com](http://knfilters.com) for a complete listing of other K&N® products for your vehicle, such as oil filters, air filters, and intake kits. We recommend refreshing your K&N® Cabin Air Filter every 12 months, or 12,000 miles. Use K&N® Refresher kit pt.# 66-6000 which includes the easy to follow instructions.
