PARTS INCLUDED	QTY
Running Boards	2
Rocker Panel mounting Brackets	4
Threaded clamp plates	4

GROWLER

Step 1: Look on the underside of the body and locate the factory supplied mounting positions. **NOTE:** Some vehicles require the use of speed clips and nuts, which are supplied with the hardware kit.

Step 2: If your vehicle requires the use of the speed clips, install at this time. This requires the removal of a plastic body plug. Using a flat head screwdriver remove the plug and install one of the supplied speed clips.

Step 3: Install the brackets to the mounting locations in the body of the vehicle and install hardware. Do not tighten all the way.

NOTE: Some vehicles may require the use of additional nuts and washers for the lower portion of the mounting bracket which are supplied in the hardware kit

Step 4: Set running board along the top of both brackets and center along the cab.

Step 5: Insert the supplied threaded brackets (x2) inside the running board lip over the top of each bracket.

Step 6: With the supplied 3/8" x 1" hex bolts, secure each mounting location and leave loose.

Step 7: After final adjustment, tighten all running board threaded mounts.

Step 8: Next, adjust frame brackets so the running board is level with body of the vehicle and tighten all factory-mounting locations.

Step 9: Re-peat steps 2-8 for passenger side.
