MODEL SPECIFIC GUIDE

HIDDEN HINGE VERSION

1228

Model 1228 Chevy Silverado HD 2020 - Current Ext/Crew Cab 6.9' Bed

(W/O Multi-Flex Tailgate) (Will Not Work With Factory Bed Boxes)

****Note: The hardware kit for this truck includes 8 rubber spacers. These rubber spacers are to be placed between the plastic bed rail cap and the bed rail prior to installing the front brackets. Attach according to the diagram. Spacers should go on either side of the boss (raised section of the inside bed rail lip) for the front brackets and the clamp locations at the rear brackets, do not place over top of boss.**

RE: Step 2 on the Quick Start Guide

Measurement for the rear mounting bracket is 54 1/2" from the back side of the bulkhead to the front edge of the bracket.

RE: Step 3 on the Quick Start Guide

Measurement for the front mounting bracket is 17" from the back side of the bulkhead to the end of the bracket.

The fit of the cover to the truck bed is determined by the front mounting brackets. This measurement is a good starting point. Unfortunately not all truck beds are assembled 100% square, so some adjustments may be necessary after the cover is set on the truck.
