Pro 5 Part #: 19950, DryTech 3D Part #: 19950D, PowerCore® Part #: 199506

## REMOVAL INSTRUCTIONS

**FACTORY INTAKE** 

7. Use a ratchet and 13mm socket or wrench to remove the bolt holding the air box to the vehicle. Save bolt for Install Step 4.

**8.** Remove the two clips holding the factory scoop using a pry tool. Save clips for **Install Step 5**. Remove scoop and air box assembly from vehicle.

**9.** Remove the metal bushing and rubber grommet from the factory air scoop. Save metal bushing and rubber grommet for **Install Step 1**.

10. Remove the bolt holding the factory air scoop to the air box using an 8mm socket. Separate the scoop from box and save it for Install Step 2.

This concludes the removal of the factory intake.

**Closed Box Air Intake** 

Pro 5 Part #: 19950, DryTech 3D Part #: 19950D, PowerCore® Part #: 199506

# INSTALLATION INSTRUCTIONS

**VOLANT INTAKE** 

1. Put the metal bushing and rubber grommet from Removal Step 9 into the Volant air box.

2. Attach the factory air scoop onto the Volant air box using a 10mm and socket and wrench. Using the provided hardware; place the .625" flat washer on the M6-25mm bolt through the factory mounting location of scoop. Place the provided .25" spacer between the scoop and Volant air box. On the inside of the air box place the .75" flat washer on bolt, followed by lock washer and M6 nut.

**3.** Install the factory air scoop, and Volant air box into vehicle making sure to place the studs on the bottom of the air box into factory grommets.

4. Use the bolt saved from Removal Step 7 to attach the Volant air box to the fender with a 13mm socket.

## INSTALLATION INSTRUCTIONS

**VOLANT INTAKE** 

5. Re-install the factory scoop with clips saved from Removal Step 8.

**6.** Install filter adapter onto Volant air filter, then place air filter into Volant air box.

7. Secure the filter adapter to the Volant air box using a 10mm socket and three M6-16mm bolts, lock washers, and flat washers.

**8.** Install two #56 clamps onto the straight sleeve and place the straight sleeve on the throttle body.

**9.** Install one #56 clamp on small end of the reducer, and one #64 clamp on larger end of reducer. Place small end of reducer onto straight end of Volant air duct.

10. Insert the air duct onto the straight sleeve on the throttle body and large end of reducer onto the filter adapter. Adjust Volant air duct to proper fit and tighten all clamps using an 8mm socket or flat head screwdriver. NOTE: Also tighten the filter's clamp at this time.

#### INSTALLATION INSTRUCTIONS

**VOLANT INTAKE** 

 Connect both factory quick disconnects to the Volant air duct.

**12.** Install the Volant lid using the provided 4 truss head screws with rubber washers and Philips head screwdriver.

Check that this air intake complies with your Federal, State and Local laws. We recommend saving your stock system.

#### **BEFORE ROAD TESTING**

- 1. Start engine, leaving the transmission in park and securing the parking brake.
- 2. Make sure to look and listen for any unusual noises or air leaks. Repair problems if needed.
- 3. Once completed it will be necessary to check periodically, after a few heat cycles, for realignment and tightening of all connections.

#### **Pro 5 CARE AND CLEANING**

Check the Pro 5 cotton reusable filter periodically and remove any excessive dirt build-up by tapping the filter on the ground and brushing off the loosened dirt. Clean the filter by using a two stage cleaning kit to thoroughly clean and re-oil the filter. Re-oil every 10,000 miles without cleaning to improve filtering in sand and dirt. Clean only when dirt is very excessive or 50,000 miles.
